Eco-Friendly Habit Tracker

Introduction

In today's fast-paced world, maintaining positive habits while balancing work, health, and personal growth can be challenging. The **Eco-Friendly Habit Tracker** is designed to help users effectively manage their daily routines by providing a structured and intuitive tracking system. To ensure smooth development and implementation, the project follows an organized **To-Do List**, where key tasks are systematically planned before execution. The initial phase of development focuses on essential features such as **user registration, login, habit creation, editing, deletion, and category assignment**. By addressing these fundamental tasks, the project establishes a strong foundation for a seamless and efficient habit-tracking experience, ultimately empowering users to stay consistent and motivated in their journey toward self-improvement.

User Stories

1. User Sign-Up and Login

As a user, I want to sign up and log in so that my habit data is saved and synced across devices.

2. Habit Management

As a user, I want to create, edit, and delete habits and assign them to predefined categories.

3. Progress Tracking

As a user, I want to see visual charts and logs of my habit performance to track my improvements.

4. Reminders & Notifications

As a user, I want timely reminders to complete my habits, so I never miss an important task

5. Detailed Habit History

As a user, I want to view a detailed history of my habits to analyze past performance

6. Streaks and Goal Achievement System

As a user, I want to earn streaks for maintaining consistent habits so that I feel motivated to keep progressing

7. Customizable Dashboard

As a user, I want to customize my dashboard to focus on the metrics that matter most to me, allowing for a more personalized experience

8. Final Integration and Polishing

As a user, I want the final product to be fully integrated and bug-free, ensuring a smooth and enjoyable user experience.

User Stories and Specifications (Sprint 3)

1. Streaks and Goal Achievement System

- **User Story:** As a user, I want to earn streaks for maintaining consistent habits so that I feel motivated to keep progressing.
- **Sub-User Stories:**
 - As a user, I want to receive notifications when I hit a streak milestone.
 - As a user, I want to see my current streak displayed prominently on my dashboard.
 - As a user, I want to be rewarded with badges for achieving streaks.

2. Customizable Dashboard

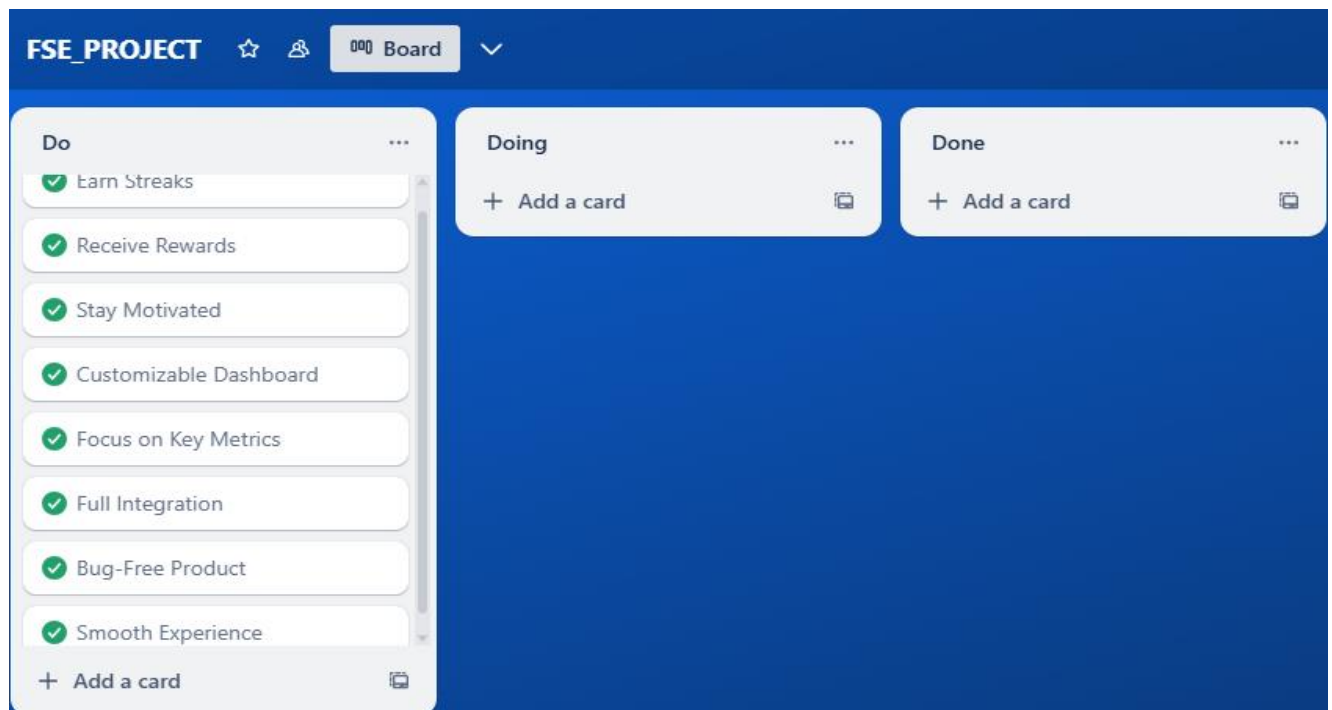

- **User Story:** As a user, I want to customize my dashboard to focus on the metrics that matter most to me, allowing for a more personalized experience.
- **Sub-User Stories:**
 - As a user, I want to choose which metrics to display on my dashboard.
 - As a user, I want to rearrange the layout of my dashboard components.
 - As a user, I want to save my dashboard preferences for future sessions.

3. Final Integration and Polishing

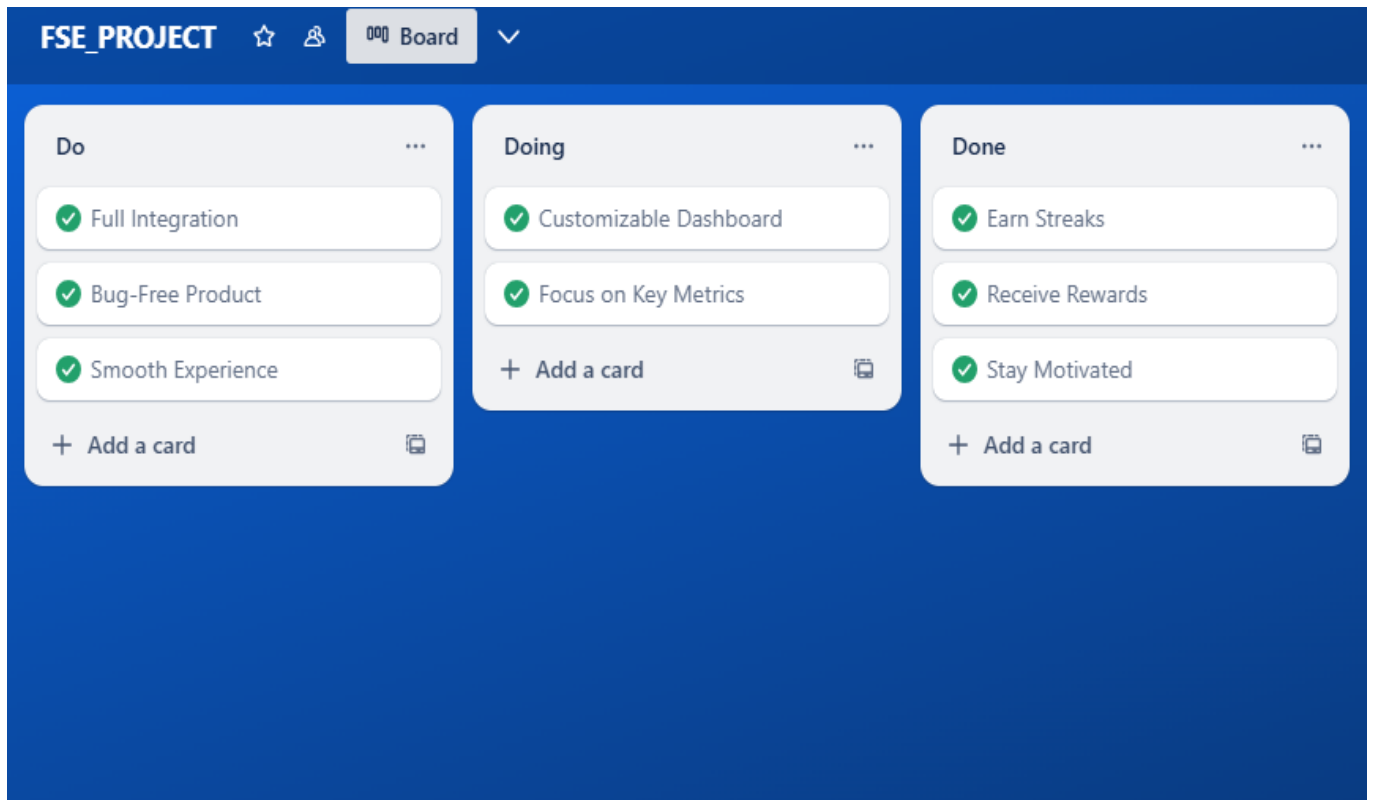

- **User Story:** As a user, I want the final product to be fully integrated and bug-free, ensuring a smooth and enjoyable user experience.
- **Sub-User Stories:**
 - As a user, I want to report any bugs or issues easily within the app.
 - As a user, I want to receive regular updates about bug fixes and new features.
 - As a user, I want to experience seamless transitions between different sections of the app.

Architecture diagram

Layered Architecture - Eco-Friendly Habit Tracker (C# WinForms)

Lessons Learned by the Group

- 1.Communication:** Clear communication is essential for team collaboration.
- 2.Time Management:** Setting deadlines helps keep the project on track.
- 3.Adaptability:** Being flexible with changes leads to better outcomes.
- 4.Feedback:** Regular feedback improves quality and team performance.
- 5.Documentation:** Keeping detailed records aids future projects and knowledge sharing
